We Are Future Health Professionals

Health and Bio-medical Science Education Is Strengthened by Leadership Development and Teaming Skills

The HOSA-100 National Advisory Council emphasizes the importance of providing future health professionals with a strong foundation of technical content and soft skills. HOSA members are provided with leadership development opportunities as a member of a HOSA chapter and an active member of one or more HOSA committees and eventually chairing a committee or task force. Members have special opportunities to participate in local, state and national leadership development training and are encouraged to practice and refine their leadership skills as a chapter or association officer as needed. The HOSA chapter advisor will provide special experiences for members who wish to enhance their technical, leadership and teaming skills.

Competitive Events Provide Recognition Opportunities and Prepare Students for College and Beyond

The health industry approved curriculum and sponsored Competitive Events Program provides HOSA members with the best of both worlds – the best classroom education and the best student-led organizational opportunities – in becoming college and career ready. There are 82 health industry approved Competitive Events a HOSA member can explore for local competition in hopes of advancing to regional, state and international competition. The HOSA advisor uses the Competitive Events Program as one more tool to motivate and energize members to be the best they can while seeking recognition from HOSA and the health industry sponsor. Being an Event Champion is a resume attention getter!

HOSA Provides the Health Industry With A Pipeline of Future Health Professionals.

Employment in the health industry is projected to grow 18% by 2026, much faster than the average growth for all professions, adding about 2.4 million new jobs.

Physical therapists, physician assistants, registered nurses, home health aides, pharmacists, dietitians, and nutritionists are among the professions highest in demand.

HOSA-Future Health Professionals provides opportunities for students to develop, practice, and refine their technical, leadership, and team skills to achieve a seamless transition from education to a health profession.
