

STARLA'S

Hands On Body Systems

“TWO BRAINS ARE BETTER THAN ONE!”

Students will build the components of the Central Nervous System out of brightly colored clay. As each structure is built, students will gain understanding to the structure, main functions, and inter-relationships of each part of the CNS to other systems and real-life experiences. Students take their new CNS with them at the end of the workshop!

*Thursday, Ballroom A,
seating is limited*

- *Session 1 at 2PM*
- ⋮
- *Session 2 at 4PM*

Check out Starla Ewan's website

🌐 <https://www.starlasteachtips.com/>

Each session can accommodate around 150 students! Attendance is on a first-come, first-served basis! The system and materials are provided by SC HOSA. Advisors are welcome to join, but only after all students have entered the session and if there is available space.
