

ATC tests ARE NOT included with SLC conference registration.

Cost: \$10/test

ATC tests do not qualify members for ILC.

There is no limit in the number of ATC tests a member can take.

Category: NGL/Cengage ATC Testing Center.....

Eligible Divisions: Secondary, Postsecondary, Collegiate, Alumni	Format: Online 50 Q test (60 minutes)	Digital Upload: NO
Solo Event: 1 tester	Testers MUST Bring basic handheld calculators (no graphing calculators) for addition, subtraction, division, multiplication, and square root to testing session	

ATC Testing will take place during the SLC Online Testing Window

February 24th - March 2nd (8am-6pm)

- ✓ **Chapter advisors will coordinate testing time and location for the online testing session within the designated testing window.**
- ✓ **Chapter advisor must designate a proctor for the testing session that does not have content knowledge related to any HOSA event ensuring the integrity of the competitive events program.**

Event Summary

The National Geographic Learning Academic Testing Center (NGL ATC)—AAFP-sponsored event aims to provide HOSA Members at chartered association conferences and the International Leadership Conference with additional opportunities to demonstrate their basic knowledge in preparation for becoming future health professionals.

The NGL ATC series of events consists of tests based on items from the identified text/resource specific to each event. Testers will recognize, identify, define, interpret, and apply knowledge in a 50-item multiple-choice test with a tie-breaker question. The test will measure knowledge and understanding at the recall, application, and analysis levels. Higher-order thinking skills will be incorporated.

General Event Information

General Rules	Testers must be familiar with and adhere to the General Rules and Regulations .
Dress Code	The Chapter Advisor will determine the dress code requirements for all SLC online testing events.
Testers Must Provide	Laptop with internet access to the HOSA Online Testing System: https://testing.hosa.org/

ROUND ONE- Test

REQUIRED-Registration Priority and Process	1. There are no qualification rules for NGL ATC tests between SLC and ILC. Members can take the test at state, ILC, both, one or the other, etc. They do not need to score a certain percent or finish at a certain rank at the state conference. Members do NOT need to have taken the test at state in order to take the test at ILC. 2. SLC registration Members who wish to take NGL Academic Testing Center tests must pay \$10 per test. There is no maximum limit to the number of NGL ATC tests that can be taken for SLC. 3. Members will pre-register for the NGL Academic Testing Center at SLC in the HOSA Conference Management System.
Test Instructions	The online test will consist of 50 multiple choice questions in a maximum of 60 minutes. An essay tiebreaker question will be administered with the original test. Essay tiebreakers will be completed online.
Recognition and Awards	1. An ATC Test button will be provided to everyone participating in the online NGL Academic Testing Center. 2. At SLC, Top 5 schools will be recognized on stage and receive a Certificate of Achievement. (Chapter scores will be determined by calculating the average of all chapter scores on all tests) 3. All testers scoring $\geq 80\%$ will be recognized during the Recognition Session with names displayed on screen and posted on www.schosa.org website.

Test Options and Resources

Event	Resource Title (National Geographic Learning/Cengage)	ISBN
A. Allied Health Statistics	Basic Allied Health Statistics and Analysis, 5th Edition	9781337796965
B. Anatomy and Physiology	Body Structures and Functions, 14th edition.	9780357457542
C. Biochemistry	Introduction to General, Organic, and Biochemistry, 12th edition	9781337571357
D. Biology	Biology: The Unity and Diversity of Life, 15th AP Edition	9781337408332

Test Plans and Sample Questions

Allied Health Statistics:	- Identify the importance of health statistics and health data across the continuum - 20% - Understand statistics related to census, occupancy, and length of stay in hospitals - 24% - Understand hospital obstetric and neonatal statistics - 8% - Identify clinical and non-clinical statistics - 8% - Understand terms and rates related to mortality and autopsy - 8% - Understand community health statistics - 8% - Understand the basics of math, statistics and organization of data for analysis - 16% - Understand the fundamentals of research - 8% At the International Leadership Conference, HOSA will provide basic handheld calculators (no graphing calculators) for addition, subtraction, division, multiplication, and square root calculations. Personal calculators are NOT allowed. - Which of the following facilities delivers the highest level of nursing care? A. Intermediate Care B. Residential Care C. Skilled Nursing Care D. Rehabilitation Care - Which type of validity refers to how well the study adheres to accepted and established standards? A. Face validity B. Content validity C. Construct validity D. Criterion validity - Where do low numbers appear in a frequency polygon? A. Bottom and to the right B. Bottom and to the left C. Top and to the right D. Top and to the left
----------------------------------	--

Anatomy & Physiology:	- Describe the physiology of the human body - 40% - Identify the anatomy of the human body - 40% - Identify common diseases and disorders of the human body - 20% At the International Leadership Conference, HOSA will provide basic handheld calculators (no graphing calculators) for addition, subtraction, division, multiplication, and square root calculations. Personal calculators are NOT allowed. - Health care workers use a spirometer to measure the _____. A. level of carbon dioxide in the blood
----------------------------------	--

	B. lungs' capacity for air C. amount of pressure in the lungs D. level of pleural fluid 2. What causes plasma-like fluid to flow from the blood in the glomerulus into Bowman's capsule? A. Increase in blood pressure in the capillaries B. Hormonal secretions C. Stimulation from the nerves D. Level of salt in the blood 3. Which of the following is the definition of a fomite? A. Bacterial infection transmitted through contaminated water B. Small worm that may be present in meat and infects the intestinal tract. C. Person who experiences no symptoms but can transmit an infection. D. Non Living object that is contaminated with an infectious agent
Biology:	• Describe the study of life and levels of organization - 10% • Describe the structures and functions of plant and animal cells - 20% • Describe the mechanisms of genetics and heredity - 20% • Apply the principles of evolution - 10% • Describe evolution and biodiversity - 10% • Identify structures and functions of plant and animal systems - 20% • Describe the principles of ecology - 10% 1. In the electromagnetic spectrum,_____. A. infrared energy has the shortest wavelength B. infrared radiation has more energy than red radiation C. visible light provides the energy for photosynthesis D. near-infrared radiation provides the energy for photosynthesis 2. In order for DNA molecules to undergo recombination,_____. A. they must be from the same species B. Their strands must separate as in replication C. they must be cut and spliced at specific nucleotide sequences D. one of the two DNA strands must be degrade 3. In garden peas, one pair of alleles controls the height of the plant, and a second pair of alleles controls flower color. The allele for tall (<i>D</i>) is dominant to the allele for dwarf (<i>d</i>), and the allele for purple (<i>P</i>) is dominant to the allele for white (<i>p</i>). A tall plant with purple flowers crossed with a tall plant with white flowers produces 3/8 tall purple, 1/8 tall white, 3/8 dwarf purple, and 1/8 dwarf white. What is the genotype of the parents? A. Dd Pp x Dd pp B. Dd Pp x Dd Pp C. DD Pp x dd Pp D. Dd pp x dd Pp

Biochemistry:	• Understand the characteristics of water - 10% • Describe the structure and functions of proteins, including amino acids, peptides, and enzymes - 20% • Identify the structures and functions of carbohydrates - 20% • Understand nucleic acids (DNA and RNA) and the role in genetics - 20% • Describe the structure and functions of lipids - 10% • Understand biological membranes and their role in cell transport - 6% • Explain metabolism and how ATP is produced - 14% At the International Leadership Conference, HOSA will provide basic handheld calculators (no graphing calculators) for addition, subtraction, division, multiplication, and square root calculations. Personal calculators are NOT allowed. 1. Which of the following compounds would have the highest boiling point? A. $\text{CH}_3\text{CH}_2\text{CH}_2\text{CH}_3$ B. CH_3NH_2 C. CH_3OH D. CH_2F 2. Which subatomic particle is found in all isotopes of hydrogen? A. Proton B. Neutron C. Electron D. Positron 3. $\text{CH}_3\text{C} \equiv \text{CCH}_2\text{CH}_2\text{Cl}$ is named: A. 1-chloro-3-pentyne B. 5-chloro-2-pentene C. 1-acetylenyl-3-chloropropane D. 5-chloro-2-pentyne
Career Development:	• Recognize how to begin the process of career development - 10% • Identify the required skills needed for career development - 12% • Describe individual preferences for career development - 8% • Identify values needed for career development - 8% • Understand the exploration stage of career development - 10% • Describe the relationships required for career development - 10% • Identify the stages of the decision making - 14% • Determine the tools required for career development - 6% • Understand the launch stage of career development - 16% • Recognize the skills required for career management - 6% 1. If a physician fails to use a degree of skill and learning commonly expected and the person receiving care is injured, the physician can be sued for _____. A. Negligence B. Defamation C. Malpractice D. Assault and battery 2. Patients confined to bed should have their position changed at least every _____. A. 30 minutes B. Hour C. 2 hours D. 3 hours 3. $\frac{5}{8} + \frac{3}{12} =$ _____. A. $\frac{11}{12}$ B. $\frac{13}{16}$ C. $\frac{8}{24}$

	D. 7/8
Environmental Health:	• Sustaining Resources and Environmental Quality- 10% • Natural Resources - 10% • Environmental Pollution - 10% • Climate Change - 10% • Sustainable Development - 10% • Human Population and Environment - 10% • Environmental Laws and Policies - 10% • Environmental Health and Toxicology - 10% • Environmental Hazards and Human Health 10% • Global Environmental Issues - 10% 1. What is the primary cause of ocean acidification? A. overfishing in marine environments B. increased volcanic activity C. excessive plastic pollution D. absorption of carbon dioxide from the atmosphere 2. What is the main driver of global climate change? A. increased levels of oxygen in the atmosphere B. expansion of agricultural land C. burning of fossil fuels D. natural variations in the Earth's orbit 3. Which environmental issue is directly caused by the accumulation of excess nutrients in water bodies? A. ozone depletion B. eutrophication C. deforestation D. Desertification
General Chemistry:	• Describe chemistry concepts, measurements, and calculations of moles, molar mass, and energy - 20% • Identify elements, atoms, ions, and periodicity - 10% • Describe chemical reactions, energy, and solutions - 30% • Identify chemical composition, quantities, kinetics, & equilibrium - 10% • Understand general concepts of bonding - 4% • Identify modern atomic theory - 4% • Compare and contrast acids and bases - 4% • Understand principles of chemical nomenclature - 4% • Identify the properties of matter, including solids, liquids, and gasses - 10% • Understand electrochemistry and entropy - 4% At the International Leadership Conference, HOSA will provide basic handheld calculators (no graphing calculators) for addition, subtraction, division, multiplication, and square root calculations. Personal calculators are NOT allowed. 1. Select the correct molecular structure for CO₂: A. linear B. trigonal planar C. tetrahedral D. bent 2. Consider the molecular orbital description of the NO⁻ anion. Which of the following statements is false? A. NO⁻ is paramagnetic. B. NO⁻ is isoelectronic with CO.

General Chemistry:	C. The bond energy in NO^+ is greater than the bond energy in NO^-. D. The bond order in NO^- is 2. 3. For which of the following compound(s) are <i>cis</i> and <i>trans</i> isomers possible? A. 2,3-dimethyl-2-butene B. 3-methyl-2-pentene C. 4,4-dimethylcyclohexanol D. <i>ortho</i>chlorotoluene
Human Heredity:	- Identify common genetic diseases and disorders, including cancer - 24% - Understand chromosomes, inheritance, and the transmission of traits - 10% - Explain Punnett squares, pedigrees, karyotypes and the inheritance of traits - 14% - Explain how the immune system and viruses affect genes - 2% - Explain phenotypes, gene expression and gene regulation - 8% - Describe how mutations and epigenetics affects genes - 8% - Describe genetic technologies, genomes, biotechnology, reproductive technology, genetic testing and gene therapy- 12% - Describe the role of genetics, DNA, RNA, and chromosomes, and protein synthesis- 12% - Understand the process of cell division (meiosis), DNA mutations, and chromosome mutations- 10% 1. The letters G, Q, R, and C, used to describe the appearance of chromosomes, refer to the ____. A. position of the bands B. staining procedure used to reveal the bands C. number of arms per chromosome D. number of centromeres per chromosome 2. Which of the following sequences indicates the promoter region of a gene? A. CAAT B. UAAG C. CTTT D. ACAT 3. The ability to taste PTC and other bitter chemicals is controlled by ____. A. hormone levels that change throughout life B. proteins on the surface of receptor cells C. the amount of PTC exposure as a child D. the amount of capsaicin present in taste buds
Math for Health Professionals:	- Understand how to create the proper solution - 20% - Understand basic mathematical concepts and conversions - 22% - Understand how to determine proper drug dosages - 30% - Understand how to measure input and output - 4% - Identify how to convert roman numerals - 2% - Identify how to determine drops per minute and flow rate - 10% - Identify how to convert from the metric system to the English system and vice versa- 10% - Understand basic medical terminology - 2% At the International Leadership Conference, HOSA will provide basic handheld calculators (no graphing calculators) for addition, subtraction, division, multiplication, and square root calculations. Personal calculators are NOT allowed. 1. Goniometers measure A. range of motion B. weight C. surface area

Math for Health Professionals:

- D. Time
2. The hospital uses a 15-drop-per-mL drip set. How will you adjust the IV to infuse 250 mL over 3 hours?
 - A. constant infusion
 - B. every minute
 - C. every 30 seconds
 - D. every 3 seconds**
 3. Calculate the BMI for Weight: 165 pounds; Height: 73 inches.
 - A. 30
 - B. 25
 - C. 18
 - D. 22**

When a Test Answer Sheet is used – the Test Answer Sheet for this event will require testers to grid their responses with pencils. Numbers must be written with the last number of the answer in the far right box (see sample below). When a paper/pencil test is used or administered on a computer, the tester will write in or key in their response to each question. A forward slash (/) and period (.) are the only characters available as part of the answer.

ROUNDING: Converting between measurement systems will often render different answers depending on which systems and conversions are used. The answer to a calculation problem will be the same after appropriate rounding. When determining a solution, round only the final answer after completing all the calculation steps.

When rounding decimal numbers to the nearest tenths, hundredths, or thousandths place, look to the immediate right of the digit located in the position to be rounded. If the number to the direct right is 5 or larger, round up one number and drop everything that follows. If the number to the direct right is 4 or smaller, leave the position being rounded as is and drop everything that follows.

In specific situations, answers will be rounded per medical protocol. For example, pediatric dosage is always rounded DOWN to avoid potential overdose. Unless otherwise indicated, all answers should be rounded to the nearest whole number. (Examples: 31.249 (rounded down) = 31 and 23.75 (rounded up) = 24).

USE OF ZERO: Decimal expressions of less than 1 should be preceded by a zero – “leading zero”. A whole number should never be followed by a decimal point and a zero – “trailing zero”.

Microbiology:

- Identify the different types of sanitization, sterilization, and disinfection - 8%
- Identify infectious diseases and disorders - 26%
- Understand infection control, the chain of infection & pathogens transmission - 14%
- Identify healthcare associated infections - 6%
- Understand the history of microbiology - 4%
- Describe the types of immunity, immunizations, & antimicrobials - 10%
- Identify tests that can be used to determine infection - 4%

Microbiology:	• Understand asexual reproduction - 2% (CON’T PAGE 9) • Identify the characteristics of mold - 4% • Understand classifications of organisms - 6% • Identify characteristics of prokaryotic cells, including bacteria - 8% • Describe the different types of stains used in microbiology - 6% • Understand the pH scale and effect on microorganisms - 2% 1. By what mechanism does a virus cause disease? A. by infecting the nervous system in humans B. by shutting down or destroying a cell C. by living on or in another organism D. by infecting red blood cells 2. Toxic proteins that can be secreted outside of the cell are called? A. bactericides B. endotoxins C. exotoxins D. aspergillus 3. Which main class of disease-causing parasites contain tapeworms? A. Helminths B. protozoa C. ectoparasites D. Ergosterol
Organic Chemistry:	• Describe electronegativity – structure and bonding - 16% • Describe chemical bonds, shapes and naming of compounds- 16% • Describe stereochemistry - 4% • Describe substitution and elimination reactions - 6% • Identify aromatic compounds and IUPAC names - 12% • Differentiate and describe alkanes, alkenes, alkynes, cycloalkanes, alcohols, ethers, epoxides, sulfides, aldehydes, ketones, and functional groups - 26% • Identify carboxylic acids and derivatives - 8% • Understanding how to name amines - 8% • Describe spectroscopy - 4% At the International Leadership Conference, HOSA will provide basic handheld calculators (no graphing calculators) for addition, subtraction, division, multiplication, and square root calculations. Personal calculators are NOT allowed. 1. Name the following: $\text{CH}_3 - \text{CH}_2 - \text{CH}_3$ A. ethane B. propane C. butane D. Pentane 2. $\text{CH}_3\text{C} \equiv \text{CCH}_2\text{CH}_2\text{Cl}$ is named: A. 1-chloro-3-pentyne B. 5-chloro-2-pentene C. 1-acetylenyl-3-chloropropane D. 5-chloro-2-pentyne 3. What is the correct (IUPAC) name of the following molecule: 2-methyl-4-<i>t</i>-butylpentane A. 2-<i>t</i>-butyl-4-methylpentane B. 2,2,3,5-tetramethylhexane C. 2,4,5,5-tetramethylhexane D. 1-sec-butyl-1,2,2-trimethylpentane

Physics:	• Understand work, energy and particle dynamics (velocity, acceleration, force, heat, friction, motion) - 10% • Understand concepts of waves & sound and laws of thermodynamics - 10% • Understand the principles of fluid mechanics including buoyancy - 4% • Understand the principles of electricity, including current, watts, amp resistance, electrical charges, electrical circuits and electric fields - 20% • Compare and contrasts properties of light, waves and particle model - 12% • Describe optics, images and focal points - 4% • Describe the laws of thermodynamics - 10% • Understand the concept of magnetism and inductance - 10% • Understand basic mathematical concepts related to physics - 20% At the International Leadership Conference, HOSA will provide basic handheld calculators (no graphing calculators) for addition, subtraction, division, multiplication, and square root calculations. Personal calculators are NOT allowed. 1. How many moles of air must escape from a 15.0-m × 9.0-m × 6.0-m room when the temperature is raised from 10.0°C to 20.0°C? Assume the pressure remains unchanged at one atmosphere while the room is heated. ($R = 8.31 \text{ J/mol}\cdot\text{K}$) A. 4.9E+3 moles B. 1.2E+3 moles C. 2.2E+2 moles D. 7.9E+2 moles 2. A loop of area 0.384 m^2 is in a uniform 0.0565-T magnetic field. If the flux through the loop is $6.10 \times 10^{-3} \text{ T}\cdot\text{m}^2$, what angle does the normal to the plane of the loop make with the direction of the magnetic field? A. 73.7° B. 89.3° C. 16.3° D. 76.0° 3. The escape speed from the surface of the Earth is 11.2 km/s. Estimate the escape speed for a spacecraft from the surface of the Moon. The Moon has a mass 1/81 that of Earth and a radius 0.25 that of Earth. A. 2.5 km/s B. 4.0 km/s C. 5.6 km/s D. 8.7 km/s
Chapter Advisors Note:	Contact your Cengage Sales Consultant for a review copy of the reference title of your choice, for the events listed above. Most resources also offer online interactive study tools, virtual labs, and auto-graded practice. Find your Sales Consultant at NGL.Cengage.com/repfinder

Final Scoring

In the event of a tie, an essay or tiebreaker questions will be judged to break the tie.

International Leadership Conference (ILC) qualifiers

Go to <https://hosa.org/guidelines/> for specifics about this competitive event at ILC.
June 22-25, 2027, Pennsylvania Convention Center in Philadelphia, Pennsylvania

High School/Post-Secondary/Collegiate Seniors

Don't wait until you graduate to join the HOSA alumni network! Graduating from high school or completing your postsecondary/collegiate program does not mean your HOSA journey has to end. As a HOSA member, you are eligible to become a HOSA Lifetime Alumni Member- a free and valuable opportunity to remain connected, give back, and help to shape the future of the organization. Learn more and sign up at hosa.org/alumni.

SC HOSA Scholarship

Application: <https://www.schosa.org/students/scholarships/>

Application Window Opens: December 1, 2026

Application Deadline: February 1, 2027

National HOSA Scholarship

Scholarship program has funding available for HOSA members who have an interest in various health careers! The application process begins January 1, 2027, and can be found here: <https://hosa.org/scholarships/>.
